Animal cell diagrams: label parts (8-0.5) Compare cells and cell parts ( 8-0.6 ) MS-LS1-3 Construct an explanation supported by evidence for how the body is composed of interacting systems consisting of cells, tissues, and organs working together to maintain homeostasis.

~~IXL — New York sixth grade science standards~~

In the lab studies, an extended period of sniffing and exploratory behaviors were recorded when new individuals were introduced to each other, suggesting that olfaction and touch play an important role in perception. Other sigmodontine rodents communicate intraspecifically via high pitched squeaks. (Moscarella T. and Aguilera M., 1999; Nowak, 1999)
