The right mindset can make you three times more likely to get the job you want-and even less likely to lose it later. What does it take to get and keep the job you want? Ninety-six percent of employers argue that it's not just about having the right skills for the position- it's all about the right mindset. As two leading experts on the subject, Reed and Stoltz know what employers really want from the people they hire and keep. According to their extensive and globally acclaimed research, there is a specific set of mental traits that will make you exponentially more desirable to potential employers, and more likely to succeed and enjoy your job once you're hired. This "3G Mindset" is: ? Global-the openness and big-picture perspective to compete on a global scale in any job ? Good-a positive force with an unwavering moral compass ? Grit-the tenacity and resilience to thrive on adversity The authors reveal why employers are three times more likely to hire people with the right mindset over those who are more qualified on paper. This book provides an actionable approach for both assessing and developing these essential traits.

The Homeric Iliad and Odyssey are among the world's foremost epics. Yet, millennia after their composition, basic questions remain about them. Who was Homer—a real or an ideal poet? When were the poems composed—at a single point in time, or over centuries of composition and performance? And how were the poems committed to writing? These uncertainties have been known as The Homeric Question, and many scholars, including Gregory Nagy, have sought to solve it. In *Homeric Responses*, Nagy presents a series of essays that further elaborate his theories regarding the oral composition and evolution of the Homeric epics. Building on his previous work in *Homeric Questions and Poetry as Performance: Homer and Beyond* and responding to some of his critics, he examines such issues as the importance of performance and the interaction between audience and poet in shaping the poetry; the role of the rhapsode (the performer of the poems) in the composition and transmission of the poetry; the "irreversible mistakes" and cross-references in the Iliad and Odyssey as evidences of artistic creativity; and the Iliadic description of the shield of Achilles as a pointer to the world outside the poem, the polis of the audience.

The first book of criticism devoted to Pynchon's massive 2006 novel, *Pynchon's Against the Day: A Corrupted Pilgrim's Guide* gathers new work by more than a dozen scholars, offering readings informed by the newest developments in narratology, genre studies, ecocriticism, globalism, and the histories of science and religion. This title also offers fresh perspectives on divisive issues within Pynchon studies, such as anarchism, gender, and reviewers' reception of his recent work. What emerges is a novel that will come to be seen, these essays argue, as a major part of Pynchon's storied legacy and a key work of the "late Pynchon."

Interdisciplinary collection of essays on fine art painting as it relates to the First World War and commemoration of the conflict Although photography and moving pictures achieved ubiquity during the First World War as technological means of recording history, the far more traditional medium of painting played a vital role in the visual culture of combatant nations. The public's appetite for the kind of up-close frontline action that snapshots and film footage could not yet provide resulted in a robust market for drawn or painted battle scenes. Painting also figured significantly in the formation of collective war memory after the armistice. Paintings became sites of memory in two ways: first, many governments and communities invested in freestanding panoramas or cycloramas that depicted the war or featured murals as components of even larger commemorative projects, and second, certain paintings, whether created by official artists or simply by those moved to do so, emerged over time as visual touchstones in the public's understanding of the war. *Portraits of Remembrance: Painting, Memory, and the First World War* examines the relationship between war painting and collective memory in Australia,

Austria, Belgium, Canada, Croatia, France, Germany, Great Britain, New Zealand, Russia, Serbia, Turkey, and the United States. The paintings discussed vary tremendously, ranging from public murals and panoramas to works on a far more intimate scale, including modernist masterpieces and crowd-pleasing expressions of sentimentality or spiritualism. Contributors raise a host of topics in connection with the volume's overarching focus on memory, including national identity, constructions of gender, historical accuracy, issues of aesthetic taste, and connections between painting and literature, as well as other cultural forms.
