An A -algebra B is said to be commutative if the ring B is commutative. Let $\phi : A \rightarrow B$ be an A -algebra. Then B becomes an A -module via ϕ , i.e. with scalar multiplication given by $ab = \phi(a)b$

Let \mathfrak{m} be the ideal consisting of all nonunits. Since $0 \in \mathfrak{m}$, 0 is a nonunit, so $1 \notin \mathfrak{m}$, and it follows that the ideal \mathfrak{m} is proper. Now, if \mathfrak{b} is any proper ideal of A then all elements of \mathfrak{b} are nonunits, so $\mathfrak{b} \subseteq \mathfrak{m}$. Thus all proper ideals are contained in \mathfrak{m} , so \mathfrak{m} is the unique maximal ideal of A .

In a relatively short time,
commutative algebra has grown in

many directions. Over a period of nearly fifty years starting from the so-called homological period till today, the area has developed into a rich laboratory of methods, structures and problem-solving tools. One could say a distinct modern trend of commutative algebra is a strong interaction with various aspects of Combinatorics and Computer Algebra. This has resulted in a new sense of measuring for old assumptions, and a better understanding of old results. At the same time, Invariant Theory and Algebraic Geometry remain constituents of an everlasting classical source, responsible for important themes that have been developed in Commutative Algebra — such as deformation, linkage, algebraic tori

and determinantal rings, etc. This volume of proceedings is well-entrenched on the lines of development outlined above. As such, it aims to keep researchers and mathematicians well-informed of the developments in the field.

The first Joint AMS-India Mathematics Meeting was held in Bangalore (India). This book presents articles written by speakers from a special session on commutative algebra and algebraic geometry. Included are contributions from some leading researchers around the world in this subject area. The volume contains new and original research papers and survey articles suitable for graduate students and researchers interested in
