Based on the assumption that scientists are participants in the culture in which

they live, Competing with the Soviets looks beyond the debate about whether

military influence distorted science in the Cold War. Scientists' choices and

opportunities have always been shaped by the ideological assumptions, political

mandates, and social mores of their times.

The Cold War placed two opposite conceptions of the good society before the uncommitted world and history itself, and science figured prominently in the picture. Competing with the Soviets offers a short, accessible introduction to the special role that science and technology played in maintaining state power during the Cold War, from the atomic bomb to the Human Genome Project.

Competing with the Soviets - CERN Document Server

Competing with the Soviet Union meant leading the world in science and technology, and it also meant using science to win the hearts and minds of the world. Not only were there space races and arms races, there were also struggles to combat poverty and efforts to develop American visions of economic change to rival the ones set forth by Karl Marx.

Competing with the Soviets. Winner of the History of Science in America Forum's Philip J. Pauly Book Prize, 2014. For most of the second half of the twentieth century, the United States and its allies competed with a hostile Soviet Union in almost every way imaginable except open military engagement. The Cold War placed two opposite conceptions of the good society before the uncommitted world and history itself, and science figured prominently in the picture.
