Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium designed for art historians, conservators, conservation scientists, and museum curators worldwide was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

The first comprehensive guide to women's promotion and use of textual culture, in manuscript and print, in Renaissance Italy.

To this day, no comprehensive academic study of the development of guidebooks to Rome over time has been performed. This book treats the history of guidebooks to Rome from the Middle Ages up to the early twentieth century. It is based on the results of the interdisciplinary research project Topos and Topography, led by Anna Blennow and Stefano Fogelberg Rota. From the case studies performed within the project, it becomes evident that the guidebook as a phenomenon was formed in Rome during the later Middle Ages and early Renaissance. The elements and rhetorical strategies of guidebooks over time have shown to be surprisingly uniform, with three important points of development: a turn towards a more user-friendly structure from the seventeenth century and onward; the so-called 'Baedeker effect' in the mid-nineteenth century; and the introduction of a personalized guiding voice in the first half of the twentieth century. Thus, the 'guidebook tradition' is an unusually consistent literary oeuvre, which also forms a warranty for the authority of every new guidebook. In this respect, the guidebook tradition is intimately associated with the city of Rome, with which it shares a constantly renovating yet eternally fixed nature.

Photoelectrochemical Hydrogen Production describes the principles and materials challenges for the conversion of sunlight into hydrogen through water splitting at a semiconducting electrode. Readers will find an analysis of the solid state properties and materials requirements for semiconducting photo-electrodes, a detailed description of the semiconductor/electrolyte interface, in addition to the photo-electrochemical (PEC) cell. Experimental techniques to investigate both materials and PEC device performance are outlined, followed by an overview of the current state-of-the-art in PEC materials and devices, and combinatorial approaches towards the development of new materials. Finally, the economic and business perspectives of PEC devices are discussed, and promising future directions indicated. Photoelectrochemical Hydrogen Production is a one-stop resource for scientists, students and R&D practitioners starting in this field, providing both the theoretical background as well as useful practical information on photoelectrochemical measurement techniques. Experts in the field benefit from the chapters on current state-of-the-art materials/devices and future directions.

120 Pages Dream Diary Journal or Diary College Ruled Great for Homeschool Perfect for taking notes in school or to use as a diary - You can even write down your plays!

Language is still a relatively under-researched aspect of the Grand Tour. This book offers a comprehensive introduction enriched by the amusing stories and vivid quotations collected from travellers' writings, providing crucial insights into the rise of modern vernaculars and the standardisation of European languages.

This book charts the fascinating history of architectural theory from the Renaissance to the present day. Addressing its subject country by country and featuring over 850 illustrations, it offers a chronological overview of the most important architects and architectural theoreticians from Alberti to Koolhaas. Book jacket.

Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology. Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.
