Summary The Dinosaur Coast. You only need to let your imagination fly and cast your gaze to where gigantic beings trod millions of years ago. This simple action carries the traveller back through time and space to a coastal land that was then populated by dinosaurs. Villaviciosa and Colunga are two coastal boroughs in eastern Asturias known for their beaches, cider and heritage, but also for the footprints of these prehistoric creatures.

North Yorkshire's coastline is also known as 'the Dinosaur Coast', so whether you're a beginner or an experienced fossil hunter, there is plenty to explore. Organised fossil hunting trips are available, designed to show people how to go about fossil collecting in a safe and responsible manner, whilst directing you to the most exciting finds. The Rotunda Museum is home to 'Scarborough's Lost Dinosaurs' – an exhibition which brings together all the fossilised evidence for

Their research demonstrated that dinosaur tracks span a coastal area between the cities of Gijon and Ribadesella. All the fossil tracks belong to the Upper Jurassic, between 140 and 160 million years old. La Griega beach is one of the nine main localities where it is possible to observe dinosaur tracks in situ.
