GIMP - Tutorials

To create a guide, simply click on one of the rulers in the image window and pull out a guide, while holding the mouse Left Button pressed. The guide is then displayed as a blue, dashed line, which follows the pointer. As soon as you create a guide, the " Move " tool is activated and the mouse pointer changes to the Move icon.

2.2. Guides - GIMP

GIMP User Manual ¶ GIMP comes with a built-in help system. Once you have started the program, press F1 for context-sensitive help. You may have to install the help pages from a separate package (gimp-help), depending on how your version of GIMP was packaged. The user manual for the GIMP 2.10 release is available in 17 languages: Català

GIMP - Documentation

Grids and Guides. You will probably have it happen many times that you need to place something in an image very precisely, and find that it is not easy to do using a mouse. Often you can get better results by using the arrow keys on the keyboard (which move the affected object one pixel at a time, or 25 pixels if you hold down the Shift key), but GIMP also provides you with two other aids to make positioning easier: grids and guides.

2. Grids and Guides - GIMP

You can add guides to the image more quickly, but less accurately, by simply clicking and dragging guides from the image rulers and positioning them where you would like. 6.29.1. Activate the Command. You can access this command from the image menubar through Image Guides New Guide. 6.29.2.

6.29. New Guide - GIMP Documentation

Intention ¶ . So you installed GIMP on your computer, congratulations! GIMP is a very powerful image manipulation software, but don ' t let that intimidate you. Even if you don ' t have time to learn advanced computer graphics, GIMP can still be a very useful and handy tool for quick image modifications. It is my hope that these few examples will help to solve those small, quick modifications ...

GIMP - Gimp Quickies

The Snap to Guides command enables and disables snap to guides. When snap to guides is enabled, the guides you set (see Show Guides) almost seems magnetic; when you move a layer or selection, the guides appear to pull on it when it approaches. This is enormously useful for accurate placement of image elements. 5.17.1.

5.17. Snap to Guides - GIMP

You can access this command from the image menubar through I mage Guides R emove all guides.
