Along with this came the necessity for non-mainline railways: branch lines and industrial railways, to keep railway companies and other businesses active and working. From the mid-1800s to the 1960s, steam locomotives were built by companies for industrial use or for use by private contractors. Many of these locomotives are preserved today, making up the majority of preserved steam locomotives in the United Kingdom.

The first steam locomotives used on any British railway, worked in industry. The use of new and second hand former main line locomotives, was once a widespread aspect of the railways of Britain. This volume covers many of the once numerous manufacturers who constructed steam locomotives for industry and contractors from the 19th to the mid 20th centuries. David Mather has spent many years researching and collecting photographs across Britain, of most of the different locomotive types that once worked in industry. This book is designed to be both a record of these various manufacturers and a useful guide to those researching and modelling industrial steam.
