Tim Price takes on the financial establishment in Investing Through the Looking Glass: A Rational Guide to Irrational Financial Markets (Harriman House, 2016). He skewers banks, central banks, economists and financial theorists, fund managers, and the financial media. He also exposes what he considers to be core delusions of the bond and stock markets: that “ bonds are safe assets that rightly form the cornerstone of

investors preserve and grow their capital in this age of inflationary and deflationary uncertainty. Tim Price provides ideas on how to find attractive investments in distorted equity markets, on what might be the best-kept secret in finance, and how best to insure portfolios in an environment of heightened systemic risk. Investing Through the Looking Glass presents a route map for navigating one of the most challenging financial environments that anyone has ever seen. For the sake of your wealth, can you afford not to read it?

Published in 1998. In spite of spectacular improvements in market flexibility, the characteristics of the past twenty years are slow growth and high unemployment. Economics

Through the Looking-Glass exposes the theoretical fallacy at the heart of the New Economic Orthodoxy. The fallacy lies in treating the economy as a "single-gear" machine guaranteed to operate at its full employment potential as long as it benefits from the lubricant of perfectly flexible markets (in a Walrasian Utopia of continuous market-clearing equilibrium). Unemployment is thereby reduced to a structural problem of market imperfection. As a cure for unemployment, market flexibility is presumed to be adequate; as a cure for inflation, monetary restriction is presumed to be safe. The flaw in Orthodox logic is exposed by a demonstration that a monetary economy operates as a 'multi-gear' machine. Unless it is in 'top-gear', market flexibility (even of Utopian

perfection) is not sufficient for full employment. 'Single-gear' Economic Orthodoxy is shown to have developed, not as a science, but as a religion beginning with Adam Smith's revelation of the Law of Competition. A Looking-Glass journey backwards in time from Adam Smith uncovers his suppression of the Law of Circulation and exposes the dangerous delusion of Orthodox economic policy. As a weapon against unemployment, market flexibility is inadequate; as a weapon against inflation, monetary restriction is unsafe. The 'multi-gear' alternative heralds the final stage of economic liberalisation: deregulation of the market for money. The rescue of interest rates from political or central bank interference and the control of inflation by a mechanism triggered by market forces would put

an end to the Orthodox policy of maintaining unemployment above its natural market rate by misguided monetary intervention.

This book analyses Iran ' s foreign policy in order to better assess its relations with India and the factors that are propelling the two nations closer. In a region susceptible to power plays, how far can India-Iran partnership go? This book will be of interest to scholars of International Relations, Iranian Politics and Iranian Foreign Policy. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Investing with the explicit goal of creating financial returns alongside measurable social and environmental benefits is catching fire. Wall Street's biggest players are rushing to provide clients with access to new impact investing options, amid growing consumer demand and evidence that the approach can be successfully executed. Recent research on outstanding impact investing funds has revealed a mature practice, vibrant with commercial investors, providing stable, predictable returns to their investors as well as supporting the creation of millions of jobs and

other tangible outcomes in markets overlooked by traditional asset managers. And yet, the individuals and organizations committed to impact investing are just the tip of the iceberg in a larger movement. This includes the growing field of social enterprise, where market-based solutions can go beyond what government and philanthropy can do to directly address society's problems. And it includes institutional investors who have utilized impact screens and shareholder activism as a risk reduction strategy over the past 30 years. Collaborative Capitalism and the Rise of Impact Investing sees these movements as signs of a much more fundamental shift, as finance as a whole responds to an increased consumer demand for market transparency—the need to

know exactly what we are buying, where and how it was made, and who it affects. By putting a lens on the underlying practices that bridge impact investing and risk mitigation finance, the book outlines the transformation in finance itself, driven by more cross-sector, transparent relationships in the service of creating long-term value for multiple stakeholders, not just shareholders.

Can states adopt protectionist cultural policies? What are the limits, if any, to state intervention in cultural matters?

A wide variety of cultural policies may interfere with foreign investments, and a tension therefore exists between the cultural policies of the host state and investment treaty provisions. In some cases, foreign investors have claimed that cultural policies have negatively affected their investments, thereby amounting to a breach of the relevant investment treaty. This study maps the relevant investor-state arbitrations concerning cultural elements and shows that arbitrators have increasingly taken cultural concerns into consideration in deciding cases brought before them, eventually contributing to the coalescence of general principles of law demanding the protection of
