For centuries, experts have argued that learning was about memorizing information: You're supposed to study facts, dates, and details; burn them into your memory; and then apply that knowledge at opportune times. But this approach to learning isn't nearly enough for the world that we live in today, and in *Learn Better* journalist and education researcher Ulrich Boser demonstrates that how we learn can matter just as much as what we learn. In this brilliantly researched book, Boser maps out the new science of learning, showing how simple techniques like comprehension check-ins and making material personally relatable can help people gain expertise in dramatically better ways. He covers six key steps to help you "learn how to learn," all illuminated with fascinating stories like how Jackson Pollock developed his unique painting style and why an ancient Japanese counting device allows kids to do math at superhuman speeds. Boser's witty, engaging writing makes this book feel like a guilty pleasure, not homework. *Learn Better* will revolutionize the way students and society alike approach learning and makes the case that being smart is not an innate ability--learning is a skill everyone can master. With Boser as your guide, you will be able to fully capitalize on your brain's remarkable ability to gain new skills and open up a whole new world of possibilities.

For centuries, learning emphasized memorizing information: You were supposed to study facts, dates, and details, and burn them into your consciousness. But this approach to learning is outdated and contrary to how our brains really work. In *Learn Better*, writer and education researcher Ulrich Boser maps out the new science of learning, demonstrating how we can gain expertise in dramatically better ways. In this entertaining and engrossing book, Boser argues that learning is a skill, showing how techniques like self-questioning and thinking about thinking can create much deeper levels of understanding. Among the important findings and practical tips, Boser tells fascinating stories, like how Jackson Pollock came to his revolutionary drip painting method--and why an ancient counting device helps people gain superhuman math skills. This powerful book will revolutionize the way that you acquire mastery, with far-reaching implications for both you and society. But perhaps most importantly, you will be able to fully capitalize on your mind's remarkable ability to develop new skills.

This series takes a fresh approach to the mastery of grade-specific skills. Each book uses a wide range of activities to spark students interest in learning. As students complete the activities, they develop the skills they need to meet academic standards in reading, writing, math, social studies, and science. Because the ability levels of students in any one grade level vary, each book spans a broad range of skills. Both teachers and parents can use the books to introduce new concepts, to assess learning and skill development, and to reinforce familiar knowledge. The versatile activities can be used for individual practice, test preparation, or homework assignments. Complete answer keys are provided.

This book shows that to succeed in professional services you need soft skills. These skills work hand in hand with your hard skills, your expertise and what you know, to make you a more effective Influencer, Persuader, Salesperson and eventually, Trusted Advisor. Mastering Soft Skills is the first book to:- Demonstrate why soft skills are so important in professional services- Categorize which specific hard and soft skills are critical to being a more effective influencer, persuader and salesperson respectively- Show how the skills help you build rapport, communicate well, create trust, be empathetic and master self control- Teach what you need to do to master them and get results People from many walks of life can benefit from these soft skills, but if you are selling to companies and your product offers little tangible advantage, or you work in professional services where people are part of the product, these soft skills are the difference that make the difference.
