We ' ve had this one on the airline and it runs nicely in both forward and reverse. The boiler too is silver soldered copper, very neatly done, and has been given a full hydraulic shell test, so can be given a full 4 year hydraulic certificate.

I am building a 1" Minnie and after assembling the cylinder to the boiler have tried to run it in compressed air with no success. I have tested the cylinder away from the boiler and it seemed ok. But after assembly on the boiler it did not work. I would appreciate any suggestion.
