Oesophago gastric Surgery Hardcover

If you have cancer of the oesophagus, you may need to have surgery to remove part or all of your oesophagus. This will depend on where exactly your cancer is and how much it has spread. If the cancer has grown into your stomach as well, you'll need to have an oesophagogastrctomy. During this procedure, your surgeon will remove part of your stomach as well as part of your oesophagus.

Oesophago gastricctomy | Health Information | Bupa UK

This surgery involves entering the abdomen and chest to remove the cancer with clear margins above and below which frequently involves the top of the stomach plus the associated lymph nodes. The resected oesophagus is replaced by forming a tube of stomach and bringing this up into either the chest or even the neck if necessary with its blood supply and rejoining to the proximal oesophagus with sutures or staples.
