Plant

Transpiration

Virtual Lab

Answer

Plant

Transpiration

Virtual Lab

Answer The

# Where To Download Plant

answerto this  
question depends  
somewhat on the  
type of plant  
and the  
situation for  
which it is  
adapted. In  
general,  
however, unless  
a plant is  
specially  
adapted for hot  
conditions, the

# Where To Download Plant

rate of transpiration will drop in a hot environment because heat stress may cause the stomata to close, which conserves water.

Journal  
Questions 1.

Describe the  
process of

transpiration in  
vascular plants.

a. Water is  
transpired from  
the plant's  
leaves via  
stomata, carried  
there via leaf  
veins and  
vascular bundles

# Where To Download Plant

Transpiration  
Virtual Lab  
Answer Key

within the  
plant's cambium  
layer. The  
movement of  
water out of the  
leaf stomata  
creates, when  
the leaves are  
considered  
collectively, a  
transpiration  
pull.
