Product design is the way you arrange the features and benefits of the product to be presented to the customer. The design can be a benefit in itself. When people used to listen to Boom box ' s, Sony brought the Walkman and it was an instant hit. It was just a product design change which involved a different technology.

[What is Product design and Importance of Product design in](#)...

A product development strategy is based on developing new products or modifying existing products, so they appear new, and offering those products to current or new markets. These strategies come about when there is little to no opportunity for new growth in a company ' s current market. At that point, a company has one of three choices:
