Our formulation development team has extensive experience in different dosage form development for both New Chemical Entity (NCE) as well as generic product development applying our technical skills, efficiency and quality consciousness to develop robust products. Our expertise lies in overcoming the challenges faced during formulation development and offer solutions to overcome flowability, solubility, wettability, dissolution, degradation, bioavailability issues encountered during development.

Formulation development and evaluation of nifedipine as ...

In the development of the co-transfer formulation, the nano-formulation exhibits good bioavailability and compatibility. For example, polymeric micelles (PMs) are self-assemblies of block copolymers providing numerous opportunities for drug delivery. Besides, the nano-encapsulated anticancer agent targeting specific tumor tissues can significantly optimize the therapeutic
