Many millions of years ago, before there were any people on Earth, dinosaurs and other creatures lived on land and in the sea. When they died, their bodies lay on the ground, or on the bottom of the sea. They became covered with mud. Over many years, the mud turned into rock, and the bones of the creatures turned into stone.

Unit 7 - Mary Anning: Stone Girl, Bone Girl | Stenson ...

KS1 SATs papers is the contracted form of "Key Stage 1 SATs papers" and children take these tests in Year 2. Hence why plenty refer to these tests as "Year 2 SATs papers" or "Year 2 SATs". KS1 SATs in 2016 , 2017 , 2018 and 2019 were 'formal' tests although exam timings were not strictly ahered to to help limit the pressure on Year 2 children.

The thoroughly updated 3rd edition of the Bestseller AIMS General Knowledge & Logical Thinking is now more powerful with the addition of 2018 questions. The book has also be upgraded with theory relevant to the questions asked in the past 3 years (2016-18). The book comprises of Indian Panorama, World Panorama, History, Indian Polity, Geography, Economy, Science, Technology, Sports, Art & Culture, Healthcare, Logical Thinking, Computers etc. Exercises in the form of MCQs are also provided. The book also provides an Update on current trends & issues with MCQs.

Discover the story of Mary Anning, the world's best-known fossil hunter. As a baby, Mary was struck by lightning, then as a little girl she found a fossilised sea monster, the most important prehistoric discovery of its time. This spectacular tale of a little girl who dared to be different and who followed her dreams will inspire young children. Beautiful illustrations and narrative text help children to learn how Mary discovered new fossils – and how her observations rocked the natural history world. Be inspired by Mary's work as a woman in the field of science – especially as her achievements weren't recognised until after her death. Perfect for kids interested in dinosaurs and rocks, and for parents looking for strong female role models in science. If you liked this, you might like the Anholt's Artists series.

A Hudson Booksellers Staff Pick for the Best Books of 2013 One of Publishers Weekly's Top Ten Spring Science Books A Bookshop Santa Cruz Staff Pick Dinosaurs, with their awe-inspiring size, terrifying claws and teeth, and otherworldly abilities, occupy a sacred place in our childhoods. They loom over museum halls, thunder through movies, and are a fundamental part of our collective imagination. In My Beloved Brontosaurus, the dinosaur fanatic Brian Switek enriches the childlike sense of wonder these amazing creatures instill in us. Investigating the latest discoveries in paleontology, he breathes new life into old bones. Switek reunites us with these mysterious creatures as he visits desolate excavation sites and hallowed museum vaults, exploring everything from the sex life of Apatosaurus and T. rex's feather-laden body to just why dinosaurs vanished. (And of course, on his journey, he celebrates the book's titular hero, "Brontosaurus"—who suffered a second extinction when we learned he never existed at all—as a symbol of scientific progress.) With infectious enthusiasm, Switek questions what we've long held to be true about these beasts, weaving in stories from his obsession with dinosaurs, which started when he was just knee-high to a Stegosaurus. Endearing, surprising, and essential to our understanding of our own evolution and our place on Earth, My Beloved Brontosaurus is a book that dinosaur fans and anyone interested in scientific progress will cherish for years to come.

This book presents papers written by colleagues of Professor Gregory E. Areshian on the occasion his 65th birthday. The range of topics includes Near Eastern, Mediterranean and Armenian archaeology, theory of interpretation in archaeology and art history, interdisciplinary history, historical linguistics, art history, and comparative mythology.

A widowed Lily comes to France hoping to make sense of her life, entrusting all of her secrets to Madame Olivetti, her aged manual typewriter, and enjoying the companionship of the seductive handyman who comes to make repairs.

Sticks, Stones, and Broken Bones: Neolithic Violence in a European Perspective presents an up-to-date overview of the evidence for violent injuries on human skeletons of the Neolithic period in Europe, ranging from 6700 to 2000 BC. Unlike other lines of evidence - weapons, fortifications, and imagery - the human skeleton preserves the actual marks of past violent encounters. The papers in this volume are written by the experts undertaking the archaeological analysis, and present evidence from eleven European countries which provide, for the first time, the basis for a comparative approach between different regions and periods. Difficulties and ambiguities in interpreting the evidence are also discussed, although many of the cases are clearly the outcome of conflict. Injuries often show healing, but others can be seen as the cause of death. In many parts of Europe, women and children appear to have been the victims of violence as often as adult men. The volume not only presents an excellent starting point for a new consideration of the prevalence and significance of violence in Neolithic Europe, but provides an invaluable baseline for comparisons with both earlier and later periods.

Listen my friends, to your heart. What is it telling you? Go ahead and dream a little dream, see where it takes you. You'll be surprised at the turn of events with every page, each new friend or what happens to that nasty evil guy. Take that chance and let your heart take the lead, I dare you. Say those things that burn in your heart, that have on occasion been blurted out. Be that hero and go to places where you fear to tread. Need someone to go with you, thereEs your buddy right beside you, sometime through thick and thin.

Jane Goodall's adventures with the chimpanzees and the important discoveries she has made about them have gained her worldwide recognition. Now she tells her exciting story in her own words! When Jane Goodall was twenty-six years old, she ventured into the forests of Africa to observe chimps in the wild. On her expeditions she braved the dangers of the jungle and survived encounters with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees - intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own. Jane Goodall has also written the bestseller In the Shadow of Man and The Chimpanzee Family Book. In 1977, she established the Jane Goodall Institute for Wildlife Research, Education, and Conservation to promote animal research throughout the world. SUMMARY: A DREAM COME TRUE From the time she was a girl, Jane Goodall dreamed of a life spent working with animals. Finally she had her wish. When she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. On her expeditions she braved the dangers of the jungle and survived encounters with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees — intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own. Jane Goodall's adventures with the chimps and the important discoveries she has made about them have gained her worldwide recognition. Now she tells her exciting story in her own words.
