This calculator calculates for concentration or density values that are between those given in the table below by a process called interpolation. Input a temperature and density within the range of the table to calculate for concentration or input concentration to calculate for density. The table below gives the density (kg/L) and the corresponding concentration (% weight) of Sodium Hydroxide in water at different temperatures in degrees centigrade (°C).

The Complete Sodium Hydroxide Density-Concentration Table ...

This is a table of density (kg/L) and the corresponding concentration (Weight% or Volume%) of Ethanol (C₂H₅OH) in water at a temperature of 20°C. The table was taken from "Perry's Chemical Engineers' Handbook" by Robert H. Perry, Don Green, Seventh Edition. The calculator does automatic interpolation calculation for density or concentration values that are between those in the table.
