Peter Nathaniel Stearns is a professor at George Mason University, where he was provost from January 1, 2000 to July 2014. Stearns was Chair of the Department of History at Carnegie Mellon University and also served as the Dean of the Dietrich College of Humanities and Social Sciences. In addition, he founded and edited the Journal of Social History. While at Carnegie Mellon, he developed a pioneering approach to teaching World History, and has contributed to the field as well through editing, a

With 83 additional outline and four-color maps, World Civilizations: The Global Experience, Fifth Edition, Atlas Edition, helps students with geography, one of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of World Civilizations is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies. Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. World Civilizations balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

While world history materials date back to prehistoric times, the field itself is relatively young. Indeed, when the first edition of Peter Stearns ' s best-selling World History in Documents was published in 1998, world history was poised for explosive growth, with the College Board approving the AP world history curriculum in 2000, and the exam shortly thereafter. At the university level, survey world history courses are increasingly required for history majors, and graduate programs in world history are multiplying in the U.S. and overseas. World events have changed as rapidly as the field of world history itself, making the long-awaited second edition of World History in Documents especially timely. In addition to including a new preface, focusing on current trends in the field, Stearns has updated forty percent of the textbook, paying particular attention to global processes throughout history. The book also covers key events that have altered world history since the publication of the first edition, including terrorism, global consumerism, and environmental issues.

Encompassing social, cultural, political and economic history, the authors examine key civilizations in world history. World Civilizations balances the discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact. MyHistoryLab is an integral part of the Stearns/Adas/Schwartz/Gilbert program. An integrated etext and and engaging resources bring history to life for students.

Examines all the world's civilizations, including those in the Western tradition but also those civilizations sometimes neglected in world history texts. Maintaining a focus on social history explores gender, class, economic, and intellectual issues, while examining patterns of inequality and human agency throughout world history. Instructors of World Civilization surveys that prefer a global account of history.

Yet another general history of the world from the earliest humans through to the modern period. This book approaches world history from a purely social perspective assessing aspects such as 'patterns of birth and death, basic value systems, relationships with government, interaction between men and women, and how people work and play'. Arranged chronologically, the chapters cover all major areas including Europe, Africa, Asia and the Americas, and address key themes in the development of societies and civilisations: population patterns, religion, gender and work relationships, material culture and social activities. Half of the book covers the period 1450 to the present-day.

Kulturens vandring fra forhistorisk tid til nutiden

The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.

World History has rapidly grown to become one of the most popular and talked about approaches to the study of history. World History: The Basics introduces this fast-growing field and addresses key questions such as: What is world history? How do we study a subject with such a broad geographic and chronological range? Why has world history been controversial? Written by one of the founders of the field and addressing all of the major issues including time, place, civilizations, contact, themes and more, this book is both an ideal introduction to world history and an important statement about the past, present and future of the field.

Offers a range of documents that illustrates civilizations from key stages in world history, with special attention to comparing major societies. Documents in World History is a thematically organized, authoritative collection of original sources that highlight political, social, cultural and economic issues in world history. The text also provides documents on the hot topics of gender and cultural history. Revised and updated with over a quarter of the documents new, the sixth edition retains its global emphasis. Standard selections and political coverage have been improved, and attention to Islam and Christianity as well as South Asia have been expanded.
