Written for core introductory coursework on language disorders, LANGUAGE DISORDERS ACROSS THE LIFE SPAN, 3rd edition has been thoroughly updated to illustrate how the latest research can be applied to actual practice by speech-language pathologists when diagnosing and treating language delays and disorders in clients of all ages. The book maintains a clear progression from preschool to school-age children to adults in order to differentiate the origins and progression of language disorders. An expanded discussion of the long term potential impacts of delays and disorders in the preschool years leads in to a new

chapter that explores how to set the stage for linguistic and literacy success. Expanded content also includes a new chapter on autism, coverage of right hemisphere deficits in TBI, an expanded discussion of syndromes, and a new discussion of the effects of nicotine on the developing fetus. With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.
