The Foundations of Program Verification (Wiley-Teubner Series in Computer Science) a été écrit par Jacques Loeckx qui connu comme un auteur et ont écrit beaucoup de livres intéressants avec une grande narration.

The Foundations of Program Verification (Wiley-Teubner ...

This is a textbook on program verification. It concentrates on those verification methods that have now become classic such as the inductive assertions method of Floyd, the axiomatic method of Hoare and Scott's fixpoint induction. The aim of the book is to present these different verification methods and to explain their mathematical background.
