Nadcházející zima je období, kdy se ráno (a n kdy i celý den) setkáváme na silnicích s mlhou. Meteorologové považují za mlhu oblak, který leží bezprost edn nad zemí a výrazn omezuje viditelnost na vzdálenost nižší než 1 km, ale pro provoz na pozemních komunikacích je dohlednost na 1 km ještě zcela dostate ná a nejedná se o situaci, která by vyžadovala ...

A Reading Course in Homeric Greek, Book One, Third Edition is a revised edition of the well respected text by Frs. Schoder and Horrigan. This text provides an introduction to Ancient Greek language as found in the Greek of Homer. Covering 120 lessons, readings from Homer begin after the first 10 lessons in the book. Honor work, appendices, and vocabularies are included, along with review exercises for each chapter with answers.

Deník N

A groundbreaking book about the history and,principles of Ethiopic (Ge'ez), an African writing,system designed as a meaningful and graphic,representation of a wide range of knowledge.

Deník N

Indicators in this volume provide international benchmarks for assessing the condition of education in U.S. states and in the United States as a whole by comparison with many other industrialized countries for which data are available. On six sets of indicators (37 indicators in all), country-level and state-level measures are arrayed side-by-side to facilitate comparison. The indicators are grouped into six categories: (1) background; (2) participation; (3) processes and institutions; (4) achievement and attainment; (5) labor market outcomes; and (6) finance. The presentation of each indicator includes an explanation of what it measures, why it is important, and key results from a comparison of countries and states. Throughout the report, comparisons are most often made in the text among like-sized entities. The presentation of each indicator also includes separate tables for states and countries and graphs that display states and countries together. Supplemental notes and a statistical appendix include supplemental and technical information on how measures in the indicators were calculated, and a glossary is included. (Contains 37 two-part tables and 37 figures, some of which have several parts.) (SLD)

All previous Biblical Hebrew lexicons have provided a modern western definition and perspective to Hebrew roots and words. This prevents the reader of the Bible from seeing the ancient authors' original intent of the passages. This is the first Biblical Hebrew lexicon that defines each Hebrew word within its original Ancient Hebrew cultural meaning. One of the major differences between the Modern Western mind and the Ancient Hebrew's is that their mind related all words and their meanings to a concrete concept. For instance, the Hebrew word "chai" is normally translated as "life", a western abstract meaning, but the original Hebrew concrete meaning of this word is the "stomach". In the Ancient Hebrew mind, a full stomach is a sign of a full "life". The Hebrew language is a root system oriented language and the lexicon is divided into sections reflecting this root system. Each word of the Hebrew Bible is grouped within its roots and is defined according to its original ancient cultural meaning. Also included in each word entry are its alternative spellings, King James translations of the word and Strong's number. Indexes are included to assist with finding a word within the lexicon according to its spelling, definition, King James translation or Strong's number.
